FOREWORD

Dr. Lonnie L. Fielder, Jr., senior author, retired from the Department of Agricultural Economics and Agribusiness on June 30, 1986 after 27 years on the faculty. During his tenure in the Department Dr. Fielder, in cooperation with the Louisiana Crop and Livestock Reporting Service, USDA, published agricultural statistics for Louisiana on a regular basis. This publication represents the final publication by Dr. Fielder in this series spanning over a quarter of a century and contains the complete data set for the statistical series reported through the years.

THE DEPARTMENT OF AGRICULTURAL ECONOMICS AND AGRIBUSINESS
LOUISIANA STATE UNIVERSITY AGRICULTURAL CENTER
LOUISIANA STATE UNIVERSITY

The Department of Agricultural Economics and Agribusiness carries on an extensive and coordinated program of teaching, organized research and public service in a wide variety of professional subject matter areas.

Subject matter areas include:

- Agricultural business management
- Farm organization and management
- Statistical analysis of agricultural data
- Resource, rural and community development
- Environmental economics and ecology
- Marketing - (general and commodity)
- Agricultural policy and public programs
- Land and water economics
- Applied computer programming
- Cooperatives
- Price analysis
- Tropical resource development
- International trade
- Agricultural credit and finance

The department's research in these areas is part of the organized research program of the Louisiana Agricultural Experiment Station, a division of the Louisiana State University Agricultural Center. Much of the research is in cooperation with other departments in the College of Agriculture, the Louisiana Cooperative Extension Service, state research stations, the USDA, and other State and Federal agencies.

The combination of teaching, organized research and service provides an efficient, effective and productive use of resources invested in higher education and service to the public. Emphasis in research is on solving practical problems important to various segments of the economy. Research results are made available for immediate use in the classroom and to action agencies for direct application to problems in the field. The Louisiana Cooperative Extension Service and other educational and action agencies, including the Department of Vocational Agricultural Education, the Farmers Home Administration, the Soil Conservation Service, the Federal Farm Credit System, other government agencies, farm organizations, business and industrial firms, as well as individuals, receive and use the Experiment Station's research results in the economics of land use, farm credit, resource, community and rural development, agricultural production and marketing, agribusiness, cooperatives, and public policy.

The department's coordinated teaching, research and service program provides professional training for careers in a wide variety of occupations in education, agribusiness, industry and government service. Departmental course work is supplemented by courses in other disciplines, particularly in the College of Agriculture and the College of Business Administration. Academic programs lead to degrees at three levels: Bachelor of Science, Master of Science, and Doctor of Philosophy. Course work in all curricula provides knowledge of tools and techniques useful for decision making. Emphasis in the undergraduate program centers on developing the student's managerial ability. The graduate program builds on the undergraduate background, strengthening basic knowledge and adding more sophisticated analytical skills and business capabilities.
